Summary:

The Quality Assurance Packaging Inspector II is responsible for ensuring the day to day support to Production and R & D operations through the inspection of all packaging areas, line clearance of room and equipment and visual inspection of finished Transdermal products, to ensure that packaged products conforms to quality standards. This is accomplished through tasks, which include, but may not be limited to, sampling and submission of finished products samples and swab samples to Quality Control.

Essential Job Functions:

- Enforce cGMP regulations and Aveva's Standard Operating Procedures (SOPs) in the Production and R&D packaging areas.
- Packaging room and equipment line clearance.
- Sampling and inspection of finished transdermal products including AQL plans.
- Complete Inspection forms for packaging.
- Sampling product for on-line inspection, stability, QC/R&D Labs, reworks, controlled substance, etc.
- Prepare AQL plans.
- Track results of AQLs.
- Work with Production to resolve problems when defects are found on line.
- Prepare a Product Standard Library as each new product is launched.
- Contribute to Defect Library.
- Other duties assigned as required.

Required Knowledge and Skills:

- English usage, spelling, and punctuation.
- Computer systems and software applications.
- Ability to read, analyze and interpret general documents, procedures, and periodicals.
- Ability to work with mathematical concepts such as fractions, percentages, ratios, and proportions to practical situations.
- Ability to interpret a variety of instructions furnished in written, oral, diagram or schedule form.
- Strong organizational skills.
- Able to manage multiple tasks simultaneously, be responsive and adaptable to project/task change based on business requirements
- Ability to organize utensils, containers, labeling and materials to efficiently perform SWAB sampling

Minimum Qualifications:

Associate degree (A.A.) from two-year college; or one to two years related experience and/or training; or equivalent combination of education and experience. Quality Assurance experience in the pharmaceutical or other regulated industry preferred.
